KIRRIN RESOURCES INC. (formerly Monroe Minerals Inc.)

Notes to Consolidated Financial Statements

June 30, 2009 - Unaudited

Kirrin Resources Inc. (formerly Monroe Minerals Inc.) (the 'Company') is incorporated under the laws of Alberta. The Company's principal business is the acquisition, exploration and development of uranium resource properties.

1. Basis of presentation and significant accounting policies:

The unaudited consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in Canada, and follow the same accounting principles and methods of application as those disclosed in Note 1 to the Company's audited consolidated financial statements for the year ended December 31, 2008. These financial statements do not include all disclosures required by Canadian generally accepted accounting principles ('Canadian GAAP') for annual financial statements and, accordingly, should be read in conjunction with the Company's consolidated financial statements included in the 2008 Annual Report.

The preparation of financial statements in conformity with Canadian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the period. Actual results could differ from those estimates.

The Company is a development stage company. These consolidated financial statements have been prepared using accounting principles applicable to a going concern. The Company has a history of losses and no operating revenue other than interest income and the receipt of proceeds on the sale of subsidiaries and sundry assets. The ability of the Company to carry out its planned business objectives is dependant on its ability to raise adequate financing and generate operating profitability and positive cash flow, which casts doubt on its ability to continue as a going concern. If the Company is unable to obtain adequate additional financing, it will be required to curtail its activities. The consolidated financial statements do not reflect adjustments, which could be material, to carrying values of assets and liabilities, which may be required should the Company be unable to continue as a going concern.

As disclosed in the December 31, 2008 annual audited consolidated financial statements, on January 1, 2009 the Company adopted the accounting standard 'Goodwill and Intangible Assets', which establishes revised standards on the recognition, measurement, presentation, and disclosure of goodwill and intangible assets. The adoption of this standard has not had a material impact on the consolidated financial statements.

2. Mineral interests:

Mineral interests under development totalling \$1,732,299 (December 31, 2008 - \$1,696,373) are not subject to depletion and amortization.

On June 30, 2008, the Company completed the sale of its South African subsidiary for consideration of US \$1,300,000, of which US \$1,050,000 was paid in cash. US \$300,000 of the sale consideration was placed in escrow, to be released upon the outcome of certain events. On June 29, 2009, the Company reached agreement on the settlement of various contractual issues, including the disposition of escrow funds, arising from the sale contract. The amount of \$362,000 was received subsequent to the quarter end and has been included in accounts receivable and gain on disposal of subsidiary at June 30, 2009.

3. Amount due to related party:

The amount due to related party of \$110,000 (December 31, 2008 - \$110,000) is in respect of unpaid salary to the President of the Company, is unsecured, has no repayment terms and bears no interest. The President has agreed not to demand repayment of the balance before July 2010.

The Company is also indebted to its President in the amount of \$189,382 (December 31, 2008 - \$148,846), included in accounts payable and accrued liabilities, in respect of expenses incurred on its behalf in the amount of \$29,382 (December 31, 2008 - \$38,846) and unpaid salary of \$160,000 (December 31, 2008 - \$110,000).

The above transactions were in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to as approximating fair value by the transacting parties.

4. Share capital and other:

Authorized:

Unlimited number of common shares without nominal or par value.

Unlimited number of preferred shares in one or more series, none of which have been issued

Outstanding and exercisable at end of period	4,123,783	\$1.36	46,272,829	\$0.11

5. Financial instruments

The Company is exposed in varying degrees to a number of risks arising from financial instruments. Management's close involvement in the operations allows for the identification of risks and variances from expectations. The Company does not participate in the use of financial instruments to mitigate these risks and has no designated hedging transactions. The Company's main objectives for managing risks are to ensure liquidity, the fulfilment of obligations, the continuation of the Company's exploration program, and limit exposure to credit and market risks. There were no changes to the objectives or the process from the prior year.

The types of risk exposure and the way in which such exposures are managed are as follows:

a) Fair values:

The Company's financial instruments recognized on the balance sheet consist of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities and amount due to related party. The fair values of the Company's financial instruments, excluding amount due to related party, approximate their carrying value. The fair value of the amount due to related party is not determinable as there are no set terms of repayment.

b) Market risk

Foreign currency risk

The Company has \$3,261 (US \$2,821) (December 31, 2008 - \$139,337 (US \$113,949)) in US currency held in low risk, secure US dollar investments at financial institutions. Foreign exchange risk related to required payments is perceived as low risk.

Commodity price risk

The Company is a development stage company and has no production or sales revenues. Accordingly, it is not exposed to commodity price risk.

c) Credit risk

The Company does not engage in any sales activities and has no significant credit risk arising from operations. Credit risk primarily arises from the Company's cash and accounts receivable. The risk exposure is limited to their carrying amount at the balance sheet date.

Cash is held as cash deposits. The Company does not invest in asset-backed deposits or investments and does not expect any credit losses. The Company periodically assesses the quality of its investments and is satisfied with the credit rating of the banks.

d) Liquidity risk

Financial liquidity represents the Company's ability to fund future activities and obligations as and when required. The Company endeavours to ensure that it has sufficient capital to meet short term business requirements. As at June 30, 2009, the Company has a working capital deficiency of \$93,198 (December 31, 2008 - \$57,808).

KIRRIN RESOURCES INC. (formerly Monroe Minerals Inc.)

Notes to Consolidated Financial Statements June 30, 2009 - Unaudited

6. Capital management

The Company's capital structure reflects its strategy and the financial environment in which it operates. The objectives when managing capital are to maintain adequate levels of funding to support the acquisition, exploration and development of uranium resource properties, to maintain the necessary corporate and administrative functions to facilitate these activities, and to safeguard the Company's ability to continue as a going concern.

The Company's current portfolio of properties is in the exploration stage and the Company is dependent primarily on external equity financing to fund its activities. There can be no assurance that the Company will be able to raise capital in this manner in the future. The Company will utilize its existing working capital, and raise additional amounts as required, to carry out planned exploration and to fund administrative costs. The Company will continue to assess new properties and to seek to acquire interests in additional properties if it believes sufficient economic potential exists and it has adequate financial resources to do so.

There was no change in the Company's approach to capital management during the period ended June 30, 2009. The Company is not subject to externally imposed capital requirements.

7. Income taxes:

The income tax provision differs from the amount which would be obtained by applying the Canadian expected tax rates to income before income taxes as follows:

	June 30 2009	December 31 2008
Income tax rate	29.5%	29.5%
Computed expected income tax reduction	\$ (2,061)	\$ (64,753)
Adjustments:		
Stock based compensation	1,039	37,345
Tax assets lost on sale of subsidiary	-	968,542
Accounting gain on sale of subsidiary	-	(266,950)
Tax deductible exploration costs lost on sale of subsidiary	-	1,728,048
Effect of change in tax rate and other	17,519	(411,888)
	16,497	1,990,344
Valuation allowance	(16,497)	(2,400,344)
	\$ -	\$ (410,000)

The components of the net future income tax asset at June 30, 2009, no portion of which has been recorded in these financial statements, are as follows:

	June 30 2009	December 31 2008
Non-capital/net operating losses	\$ 1,376,000	\$ 1,326,000
Share issue costs	56,000	84,000
Capital losses	23,000	23,000
Mineral interests	(433,000)	(415,000)
	1,022,000	1,018,000
Valuation allowance	(1,022,000)	(1,018,000)
	\$ -	\$ -

The Company has Canadian tax losses of approximately \$4,256,000 with expiry dates ranging between 2009 and 2029.

8. Subsequent event:

On July 15, 2009, the Company issued 50,000 common shares at \$0.08 per share for consideration of \$4,000 as part of its installment obligations for the acquisition of its interest in the Alexis River property.

On August 20, 2009, the Company issued options over 75,000 common shares at an exercise price of \$0.10 per share to a consultant. The options will vest 25% annually and expire on August 31, 2014.

Management's Discussion and Analysis

June 30, 2009

Management's Discussion and Analysis ('MD&A') has been prepared as of August 28, 2009. It should be read in conjunction with the Kirrin Resources Inc. (formerly Monroe Minerals Inc.) ('Kirrin' or 'the Company') consolidated financial statements and notes thereto for the year ended December 31, 2008.

Information provided herein relating to 2009 and later years is based on assumptions regarding future events and results may vary. All prices are in Canadian dollars unless otherwise stated.

The above referenced financial statements and the Company's other public filings can be found on SEDAR at www.sedar.com.

Second Quarter Highlights

Highlights during the second quarter of 2009 include:

- On May 1, 2009, the shareholders approved the consolidation of the share capital of the Company on the basis of one new common share for each ten old common shares of the Company, authorized the Board to amend the Company's articles to effect the change of name of the Company to 'Kirrin Resources Inc.', authorized the reduction of the stated capital account for the common shares of the Company by an amount of \$8,000,000 and correspondingly reducing the accumulated deficit of the Company, approved an amendment to the stock option plan, and approved the repricing of all outstanding stock options. Regulatory approval for these changes has been received.
- On June 17, 2009, the Company announced that it had entered into an option agreement with Kodiak Exploration Ltd. ("Kodiak") allowing it to earn up to a 70% interest in Kodiak's Otish Basin uranium property portfolio located in Québec, Canada. The transaction is subject to contract and to regulatory approval.
- On June 29, 2009, the Company reached agreement on the settlement of various contractual issues relating to its sale of diamond properties in 2008. Consequent upon the settlement, on August 20, 2009, the Company received \$362,000, representing the proceeds of the escrowed portion of the sale consideration,

Properties

Kirrin's technical expertise lies in project selection and exploration planning and implementation. Present goals include the identification of additional exploration properties in Canada, as well as the selection of larger scale uranium projects in Africa and elsewhere. Kirrin is current on its earning obligations in all of its projects.

The Qualified Person who has reviewed the information on Properties contained in this MD&A is Dr. Reg Olson, Ph.D., P. Geol.

Kirrin Resources Inc. (formerly Monroe Minerals Inc.)

ALEXIS RIVER

The Alexis River property, located in southeastern Labrador, is approximately 2,500 hectares in size and the area is underlain by rocks assigned to the Pinware Terrane of the Eastern Grenville Province, which are potential hosts for uranium mineralization. Kirrin may earn a minimum 60% interest in the Alexis River property over four years by spending \$1,250,000 on exploration and issuing 2,500,000 shares to Altius Resources Inc. ('Altius').

Since acquiring an interest in Alexis River, Kirrin has overseen: a helicopter borne radiometric and magnetometer survey conducted by Altius in July 2007; limited follow-up prospecting by Altius over selected airborne radiometric anomalies; additional lake sediment sampling of Anomaly Lake during August and September 2007; further systematic lake sediment sampling conducted by Altius in February 2008 and by Kirrin in June and July 2008; and a total of 1,294.5 metres drilled in five holes in October 2008 intended to test bedrock beneath Anomaly Lake.

The lake sediment sample results for uranium are unusually high, being well over two orders of magnitude higher than the average uranium content of lake sediment samples within Labrador. The highest uranium content recorded during the above sampling programs was 2,370 ppm U.

The key drilling results are from two holes, with the best intercept (a) in hole AL0802 being 0.754% U_3O_8 across 0.2 m from 58.9 m to 59.1 core length, plus a second intercept of 0.069% U_3O_8 across 2.0 m from 83.0 to 85.0 m, and (b) in hole AL0805 being 0.188% U_3O_8 across 0.85 m from 197.7 m to 198.55 m core length, with five other lower grade intercepts higher in the hole ranging down to 0.034% U_3O_8 across 0.4 m from 16.7 m to 17.1 m. These intersections are all from unaltered, biotitic coarse-grained granitic dykes cutting mafic rocks.

Kirrin concludes that the anomalous uranium in lake sediment at Anomaly Lake may be due to one or more causes, including (a) the narrow high grade drill intercepts that exist locally in bedrock beneath Anomaly Lake, (b) the highly elevated uranium in rivulet waters which drain into the northeast end of the lake, or (c) from other uranium-bearing subterranean ground waters which may discharge into the bottom of the lake. The Company has completed a summary report that documents the 2008 fieldwork and presents recommendations for a future follow-up exploration program at Alexis River, which includes a more detailed interpretation of selected airborne geophysical and topographic, regional geochemical and geological data, to be followed by additional prospecting, sampling and ground geophysical surveys.

BOXEY POINT

The Boxey Point uranium property is located in southern Newfoundland. Kirrin may earn a 60% interest in the property over four years by spending \$1,000,000 on exploration, including a minimum first year commitment of \$135,000, and issuing 2,000,000 shares to Altius, including 400,000 shares issued on signing and 1,600,000 shares divided equally over four years to be issued on each anniversary of the agreement.

The Boxey Point property totals thirty-six claims and is approximately 900 hectares in size. A 2007 prospecting and rock grab sampling program yielded elevated uranium results including two rock samples that assayed 738 ppm and 1,498 ppm uranium (0.09 to 0.18% U_3O_8) respectively.

The 2008 exploration programs included reconnaissance and locally more systematic radiometric prospecting, geological mapping, the collection of 58 rock chip and rock grab samples, plus 601

soil samples, with the bulk of the work being completed at the west-central part of the Boxey Point promontory. In addition, a detailed radiometric survey was done along a mineralized zone exposed over about 80 m in a sea cliff along the west side of the promontory. The soil samples results range from less than 0.5 ppm U up to 45 ppm U; the geochemical results indicate there are anomalous uranium trends in soils extending east-southeasterly and northeasterly up to about 1.4 km away from the radioactive zone along the west shore of Boxey Point promontory. Fourteen rock samples were analyzed for uranium; two of which assayed 325 and 359 ppm uranium (0.038% and 0.042% U_3O_8).

The 2009 work program has been planned and includes drill testing selected targets by a series of short inclined holes. This program is scheduled to commence in October.

LOST POND

In September 2008 the Company agreed to enter into an option agreement with Ucore Uranium Inc. ('Ucore') on the Lost Pond uranium and rare earth elements ('REE') property, located in western Newfoundland. The letter agreement is to be supplemented by a detailed option and joint venture agreement under negotiation. Kirrin may earn a 50% interest in the property over four years by spending \$2,600,000 on exploration, including a minimum first year commitment of \$700,000, and issuing 3,000,000 shares to Ucore, including 500,000 shares on signing.

In November 2008, Kirrin commenced a 2,500 m drilling program. Eight holes were drilled at the U2 Cataclastic Zone Grid. Five holes targeted the area which had previous intersections up to 0.045% U_3O_8 over 12.3 m. One of these targeted the down-plunge extent of the zone and hit the target at 235.4 m, resulting in an intersection of 0.038% U_3O_8 over 20.1 m, including 0.061% U_3O_8 over 3.0 m. Three holes tested uranium geochemistry anomalies located 400 m to 800 m away from the known mineralization and did not encounter any significant uranium zones. The Cataclastic Zone is interpreted as dipping about 75°: hence the estimated true widths are approx. 75% to 80% of the down-hole drill intercepts. The zone is apparently open down-plunge and additional drilling is planned.

Ten holes targeted the U3 REO zone, located about 2 km east of the U2 Cataclastic Zone. These were drilled on sections approximately 50 m apart to evaluate a discrete 250 m long bulls-eye magnetic high. This magnetic high is associated with REO minerals and previous drilling by Ucore in 2007 intersected up to 4.47% Total Rare Earth Oxides (TREO) over 5.64 m. Drilling intersected multiple mineralized zones, including 4.32% TREO over 2.0 m core length in hole LP08-13 and 1.162% TREO over 15.3 m core length in LP08-17. This near surface mineralization appears to be affected by a number of fault blocks which complicate the continuity of the rare earth-bearing U3 zone.

Additional work, including a series of short drill holes, will be required to better define the deposit geometry. True width estimates are not known at this time. The 2009 program is being planned; it is possible a small part of the drilling scheduled to commence in October will be done to follow-up test the U3 REO zone.

Properties Analysis

The following table presents the approximate carrying amounts and expenditures on the Company's mineral properties.

Kirrin Resources Inc. (formerly Monroe Minerals Inc.)

Property	December 31, 2008	Incurred during the period ended June 30, 2009	Expensed, amortized, disposed of or written down in 2009	June 30, 2009
Alexis River, Canada	\$ 735,200	\$ 12,900	\$ -	\$ 748,100
Boxey Point, Canada	303,200	15,600	-	318,800
Lost Pond, Canada	658,000	7,400	-	665,400
Projects under review	<u>-</u>	<u>64,400</u>	<u>64,400</u>	<u>-</u>
Total	\$ <u>1,696,400</u>	\$ <u>100,300</u>	\$ <u>64,400</u>	\$ <u>1,732,300</u>

Results of Operations

Operations

All of the Company's operations are at the exploration stage. Therefore, other than minimal interest earned on its cash deposits, the Company continues to create operating losses as a result of general and administration expenses required to review, acquire and evaluate assets and to maintain a public listing.

No field operations were carried out on the Company's portfolio of properties during the quarter under review. One of the Company's objectives remains the identification of suitable uranium companies and assets for acquisition, merger, strategic partnership or joint venture. During the second quarter, the extensive review by the Company of such opportunities culminated in an agreement, subject to contract and to regulatory approval, whereby the Company could acquire up to 70% interest in Kodiak's Otish Basin uranium property portfolio located in Québec, Canada. The Company continues to carry out its due diligence on this acquisition.

General and Administration Expenses ('G&A')

The gross costs (with comparative figures for 2008) are as follows:

	Three months ended		Six months ended	
	June 30, 2009	2008	June 30, 2009	2008
Salaries and benefits	\$31,109	\$ 79,282	\$60,454	\$ 183,083
Financial administration	33,742	45,483	69,653	91,274
Audit	8,750	11,755	23,817	34,451
Legal	30,680	13,390	35,659	29,560
Investor relations	29,894	24,714	79,055	74,610
Stock based compensation expense	(11,031)	52,017	3,522	115,430
General office and miscellaneous	10,999	18,789	21,545	85,688
Travel and marketing	<u>825</u>	<u>36,749</u>	<u>12,907</u>	<u>47,418</u>
Total	\$ <u>134,968</u>	\$ <u>282,179</u>	\$ <u>306,612</u>	\$ <u>661,514</u>

Kirrin Resources Inc. (formerly Monroe Minerals Inc.)

Salary costs were lower in 2009 due to the closure of the Angola office in February 2008, the disposal of the Company's diamond interests in June 2008, and agreement on reduced executive salaries. Financial administration decreased compared to the second quarter of 2008 due to a lower volume of work on the administration of flow-through obligations. The decrease in stock based compensation expense is a consequence of the repricing at May 1, 2009 of stock options issued. Audit, general office and miscellaneous costs decreased as a further consequence of discontinuing activities in Angola, the disposal of the Company's diamond interests and tight cost control.

Interest on Long Term Debt

Interest expense on long term debt decreased from \$15,857 to \$nil for the period ended June 30, 2009 as a consequence of the repayment of principal and of accumulated interest in the second quarter of 2008.

Summary of Quarterly Results

Quarterly results are unaudited.

(All figures are in \$ except share numbers)

	Three months ended							
	June 30, 2009	March 31, 2009	December 31, 2008	September 30, 2008	June 30, 2008	March 31, 2008	December 31, 2007	September 30, 2007

1. Share consolidation on the basis of one new common share for ten old common shares approved by the shareholders on May 1, 2009.
2. Quarterly information has been conformed to year end presentation.
3. No dividends have ever been paid. Fully diluted per share amounts are not presented as the results are antidilutive.
4. The above information has been summarized from the consolidated financial statements of the Company prepared in accordance with accounting principles generally accepted in Canada.
5. Refer to 'Results of Operations' for a discussion of factors that have caused period to period variations, significant acquisitions, changes in direction of Kirrin's business and other information relevant to an understanding of the Company's financial condition and results of operations.

Liquidity

Working Capital

At June 30, 2009, the Company had a working capital deficiency of \$93,198 (2008 working capital - \$1,843,889). The Company does not generate positive cash flow from operations and is dependent on its current working capital, private placements and the exercise of stock options to supplement its limited financial resources. The Company, as a result of current market conditions, anticipates a more competitive environment for future funding than hitherto experienced.

Upon the disposal of Monroe SA in June 2008, US\$300,000 of the sale consideration was placed in escrow, to be released in favour of the Company upon the outcome of certain events. On June 29, 2009, the Company reached agreement on the settlement of various contractual issues, including the disposition of escrow funds, arising from the sale contract. The amount of \$362,000 was received subsequent to period end and has been included in accounts receivable and gain on disposal of subsidiary at June 30, 2009.

Amount due to related party

Of the unpaid salary of \$270,000 (December 31, 2008 - \$220,000) due to the President of the Company, \$110,000 (December 31, 2008 - \$110,000) has been recorded as long term due to related party as the President has agreed not to demand repayment of this amount before July 2010 with the balance recorded in accounts payable.

Stock Options

No new stock options were granted or exercised during the period ended June 30, 2009.

Off Balance Sheet Arrangements

The Company does not have any off balance sheet financial arrangements.

Environmental Liabilities

Kirrin maintains its environmental rehabilitation liabilities on a current basis, thus obviating the need to accumulate a provision for this purpose.

Capital Resources

On January 8, 2009, the Company issued 400,000 common shares at \$0.01 per common share for consideration of \$4,000 as part of the acquisition of an interest in the Boxey Point property.

Subsequent to the end of the quarter, Kirrin issued 50,000 common shares at \$0.08 per share for consideration of \$4,000 as part of its installment obligations for the acquisition of its interest in the Alexis River property.

Outlook

Kirrin faces challenges in 2009, particularly in relation to financing its overhead and portfolio expansion plans. At June 30, 2009, the Company has met all of its obligations on its existing portfolio and has no expenditure obligations during the remainder of 2009 to maintain its interests.

In addition to securing new funding, the Company's priority in 2009 is the expansion of its portfolio of uranium properties.

Transactions with Related Parties

Except for the debt arrangements referred to in '*Liquidity*' there were no significant transactions with related parties.

Critical Accounting Estimates

The amounts recorded for capitalized exploration expenses, depletion and amortization, write down of mineral interests, stock based compensation, and future income taxes are based on estimates. By their nature, these estimates are subject to measurement uncertainty and changes in these estimates may impact the consolidated financial statements for future periods.

Changes in Accounting Policies Including Initial Adoption

Changes in accounting policies and recent accounting pronouncements are discussed in Notes 1(b) and 1(m) to the consolidated financial statements for the year ended December 31, 2008. These include the adoption of standards with respect to 'Goodwill and Intangible Assets' as of January 1, 2009.

Financial Instruments and Other Instruments

The Company does not hedge its exposure to fluctuations in foreign exchange rates. The Company's exposure to financial risk factors is detailed in Note 5 to the consolidated financial statements for the period ended June 30, 2009.

Controls and Procedures

In the light of the Company's small size, controls and procedures for financial reporting and proper public disclosure are affected by limited segregation of duties. To mitigate potential control weaknesses, (a) the Chief Executive Officer ('CEO') is actively involved in the day to day business of the Company including in its overseas jurisdictions, (b) the CEO and Chief Financial Officer ('CFO') have identified those individuals carrying responsibility for compiling the relevant data for each line of information in the financial statements and requested that they confirm the accuracy and completeness of same, and (c) the Company has implemented accounting data review procedures to assist the integrity of reports. It is not economically feasible, at the Company's current size and with the limited number of staff available, to achieve optimum or complete segregation of duties. Also, Kirrin does not have a sufficient number of finance personnel, with all of the technical accounting knowledge, to address all complex and non-routine accounting transactions that may arise. These weaknesses in internal controls raise the possibility that a material misstatement may not be prevented or detected.

Management and the Board of Directors work to mitigate the risk of material misstatements: the integral role of the CEO in day to day operations provides a direct connection to source data and accounting data review procedures provide a further level of assurance. Kirrin currently has no plans to remediate the above mentioned weaknesses which are linked with its current size and nature of operations.

Other Matters

Investor Relations

The investor relations program is aimed primarily at investor communications and interaction with the financial community in Canada and Europe. CHF Investor Relations of Toronto and Calgary is the Company's investor relations counsel in Canada. The monthly fee is \$4,000, plus expenses which arise, *inter alia*, in relation to briefings, presentations and the provision of publicity materials. In addition, CHF has been granted an option to acquire 1,250,000 shares in the Company to April 2012 at prices varying between \$0.12 and \$0.30 per share. Investment Connections of Versoix, Switzerland, is the Company's investor relations counsel in Europe. Remuneration arrangements are on a *per diem* basis as well as a finder's fee for private placements of the Company's securities.

Disclosure of Outstanding Share Data

The Company's authorized share capital consists of unlimited common shares without par value and unlimited preferred shares in one or more series. No preferred shares have been issued. Outstanding share data at June 30, 2009 was:

Issued and outstanding:	12,387,002
Warrants outstanding:	4,123,783
Options outstanding:	811,000

Business Risks

The exploration and development of natural resource properties involves a wide range of risks which includes, but is not limited to, the uncertainty of discovery, lack of commercial deposits following discovery, title to properties, changes in government regulations, uninsured risks, product price fluctuations, environmental factors, political and economic risks, exchange rate fluctuations and exchange controls.

Kirrin's projects are at an early stage of exploration. Kirrin's success will depend on the expertise of its management in pursuing business opportunities. The Company is in competition with companies possessing greater financial resources for both properties and personnel. The Company does not generate positive cash flow, has limited financial resources and must raise additional capital to implement its programs.

Readers are directed to the Company's web site for a fuller disclosure of business risks.

Additional Information

Additional information regarding the Company is available on the Company's web site at www.kirrinresources.com.
